

Server^e in the basement of the Chappaqua residence.^{6,7} The FBI was unable to obtain records from Cooper or Apple to verify the installation. At the time, Cooper was the only individual with administrative access to the Apple Server; however, the Clinton family and their Chappaqua residence staff had physical access to the Apple Server.^{8,9} The Apple Server initially hosted the domains presidentclinton.com and wjcoffice.com, which were used by President Clinton's staff.^{f,10,11}

(U//~~FOUO~~) Prior to January 21, 2009, when she was sworn in as the US Secretary of State, Clinton used a personally-acquired BlackBerry device with service initially from Cingular Wireless and later AT&T Wireless, to access her e-mail accounts.^{12,13} Clinton initially used the e-mail addresses hr15@mycingular.blackberry.net and then changed to hr15@att.blackberry.net.^{14,15} According to Cooper, in January 2009, Clinton decided to stop using her hr15@att.blackberry.net e-mail address and instead began using a new private domain, clintonemail.com, to host e-mail service on the Apple Server.¹⁶ Clinton stated to the FBI that she directed aides, in or around January 2009, to create the clintonemail.com account, and as a matter of convenience her clintonemail.com account was moved to an e-mail system maintained by President Clinton's aides.¹⁷ While Cooper could not specifically recall registering the domain, Cooper was listed as the point of contact for clintonemail.com when the domain was registered with a domain registration services company, Network Solutions, on January 13, 2009.^{18,19} Clinton used her att.blackberry.net e-mail account as her primary e-mail address until approximately mid-to-late January 2009 when she transitioned to her newly created hdr22@clintonemail.com account.^{20,21} The FBI did not recover any information indicating that Clinton sent an e-mail from her hr15@att.blackberry.net e-mail after March 18, 2009.

(U//~~FOUO~~) According to Cooper, in or around January 2009 the decision was made to move to another server because the Apple Server was antiquated and users were experiencing problems with e-mail delivery on their BlackBerry devices.^{22,23} At the recommendation of Huma Abedin, Clinton's long-time aide and later Deputy Chief of Staff at State, in or around fall 2008, Cooper contacted Bryan Pagliano, who worked on Clinton's 2008 presidential campaign as an information technology specialist, to build the new server system and to assist Cooper with the administration of the new server system.^{24,25,26,27} Pagliano was in the process of liquidating the computer equipment from Clinton's presidential campaign when Cooper contacted Pagliano about using some of the campaign's computer equipment to replace the existing Apple Server at Clinton's Chappaqua residence.^{28,29} Pagliano was unaware the server would be used by Clinton at the time he was building the server system; rather, he believed the server would be used by President Clinton's staff.³⁰ Clinton told the FBI that at some point she became aware there was a server in the basement of her Chappaqua residence.³¹ However, she was unaware of the transition from the Apple Server managed by Cooper to another server built by Pagliano and therefore, was not involved in the transition decision.³²

B. (U//~~FOUO~~) Second E-mail Server: March 2009 – June 2013

^e (U//~~FOUO~~) The Apple Server consisted of an Apple Power Macintosh G4 or G5 tower and an HP printer.

^f (U//~~FOUO~~) Investigation determined various employees of President Clinton maintained e-mail accounts using the presidentclinton.com domain to include:

President Clinton did not maintain an e-mail account on the Apple Server. The e-mail domain wjcoffice.com was primarily a legacy domain that contained mostly forwarded e-mail.
